MAC

METAL ARCHITECTURAL

For over 30 years, MAC Metal Architectural has offered its customers top-of-the-line steel siding and roofing designed and manufactured entirely in Canada. In our constant quest for innovation, we offer a series of profiles designed to last: elegant, versatile, and environmentally friendly—products with unique, rich colors that bring style and elegance to the projects they cover.

At MAC, we never compromise on quality or aesthetics. We make every effort to offer you products that respond to architectural trends and are the perfect stylistic complement to your property. We want to help you turn your new project into the dream place you've always imagined.

At the heart of our concerns, environmental responsibility and sustainable development are shaping the future of construction and renovation. We promise you high-performance, long-lasting products that can enhance the appearance and value of your property by 6-8%. Maintenance-free products that will protect your buildings envelope for years to come, thanks to our Peace of Mind 40-year warranty.

Let's create an inspiring space together and discover a world of possibilities where the only limit is your creativity.

LET YOURSELF BE INSPIRED!

WHY CHOOSE MAC STEEL ROOFING?

ENERGY SAVINGS

Steel roofs have great reflective qualities and low thermal conductivity. This means they can help reduce air conditioning costs by reflecting some of the sun's heat, keeping your home cool in summer and warm in winter.

ECOLOGY

Steel roofs have a longer lifespan than traditional roofs, which helps to reduce waste production and the consumption of natural resources. At MAC, our steel roof profiles are made from 86% recycled materials, and they are 100% recyclable at the end of their life. Additionally, our steel roof profiles are LEED-certified, meaning they will contribute to a sustainable construction approach.

NON-COMBUSTIBLE

Metal is a non-flammable material that does not burn or support combustion. Metal roofing materials not only contribute to your home's fire safety but also generate less toxic smoke than some other materials.

MAINTENANCE-FREE

Thanks to its robustness, a metal roof requires very little maintenance. This significantly reduces maintenance costs and long-term environmental impact, as frequent repair costs are no longer a concern.

DURABILITY

Metal roofing has several advantages over other roofing materials. One of the most significant benefits is its durability. Unlike other materials, metal won't deteriorate or crack over time. Additionally, it is UV-resistant, which means it will not deteriorate when exposed to the sun. Our paint system, TEXTURAL III & IV, is based on polyurethane and PVDF, which provides exceptional long-term protection against fading. With this system, you can rest assured that your metal roof will look great for years to come.

AESTHETICS

MAC Steel roofs are available in a variety of colors and finishes, giving you the freedom to customize your roof and match it with your home's style. Additionally, steel roofing has a classic and sophisticated look that can potentially raise your home's resale value by 6-8 percent.

When you have to choose from several options available in the market, it can be difficult to make the right choice, especially when it concerns a project of a lifetime. To assist you in making an informed decision, we would like to emphasize why MAC steel roofs are the perfect choice for your project.

MS 1

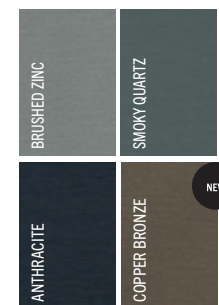

Timeless elegance

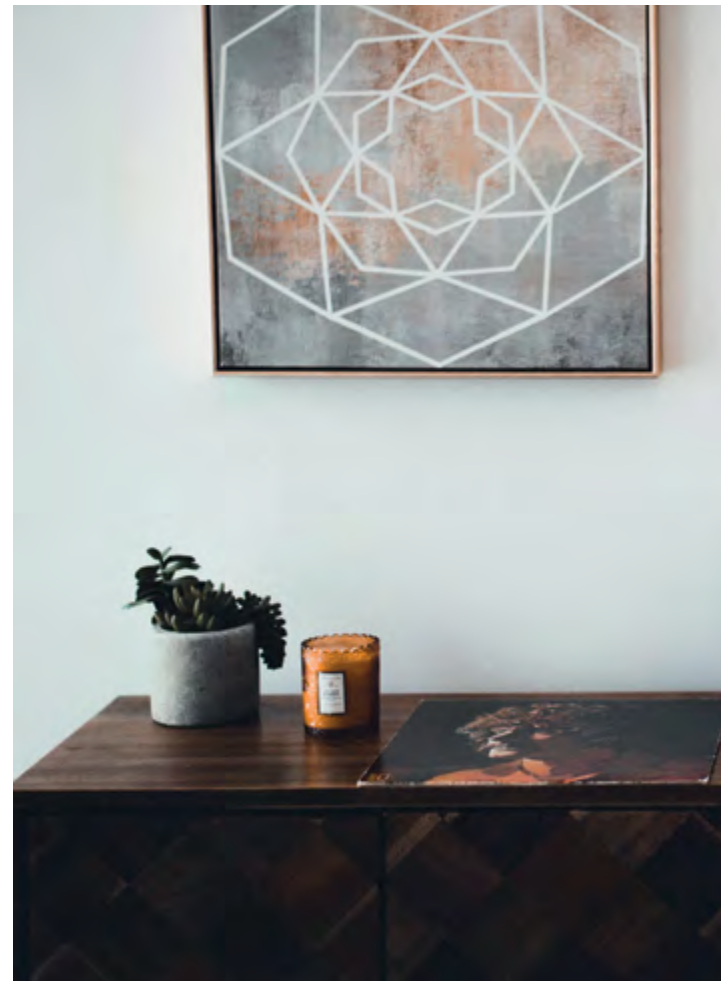

This triangular pinch-strip profile has the unique feature of having no visible joints, making it an essential element in the design of living spaces featuring clean, flat surfaces. Used for roofing, cladding, or to create a balance of harmoniously aligned lines from roof to floor, it will bring a timeless, linear design to your project.

MS 1

Continuous lines
from roof to wall

MS 2

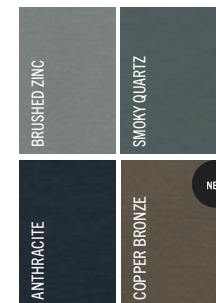

The scandinavian essence

The MS 2 profile, which features a triangular pinch strip, stands out due to its two longitudinal grooves that add elegance and distinction to the projects it covers. This profile is commonly used for Scandinavian-style projects where the cladding runs from the roof to the walls. It creates a one-of-a-kind appearance that is sure to capture attention and leave a lasting impression.

STEEL A SUSTAINABLE CHOICE

Over the years, we've worked to develop more energy-efficient and decidedly more environmentally friendly production processes, enabling us to offer solid products that comply with the most rigorous industry standards. Our steel sections are made from 86% recycled material, fully recyclable forever.

By prioritizing steel as a raw material, we actively contribute to preserving the environment and building a more sustainable future for generations to come. Our profiles will help your project achieve LEED certification, an international mark of excellence and success in sustainable construction.

CONTRIBUTE TO LEED POINT CREDIT

LEED V4.1 | Building Design & Construction (C+CB) - Heat Island Reduction (valid only for roof coverings with slopes > 2/12 depending on the Solar Reflectance Index (SRI) greater than 29 corresponding to the chosen colour) | 1 to 2 points

LEED V4.1 | Building Design & Construction (C+CB) - Environmental Product Declaration (EPD) | 1 point

LEED V4.1 | Building Design & Construction (C+CB) - Raw Materials Supply | 1 point material composition

LEED V4.1 | Building Design & Construction (B+C) - Material composition | 1 point

LEED V4.1 | Interior Design & Construction (C+CI) - Low-emitting materials | 1 to 3 points

** Please note that the LEED points shown above are awarded in the building design and are not intrinsic to our profiles.

OUR ENVIRONMENTAL CERTIFICATIONS

At MAC, we focus on transparency in our operations, reducing our carbon footprint and ensuring that our products comply with the most stringent environmental standards. To demonstrate our exemplary honesty with our customers, we offer you the opportunity to consult our environmental certifications, all verified by an independent third party.

- EPD (Environmental Product Declaration)
- HPD (Health Product Declaration)
- ETS (Environmental Technical Sheet)

** To consult our environmental data sheets, go to our website, Resources page, Technical Documents section.

OUR PLANT

• LEED - GOLD CERTIFICATION

Thanks to the adoption of sustainable building strategies in the design of our new factory and manufacturing practices, the new MAC building will be LEED V4.1 gold certified in 2024.

• ICIOR+ CERTIFICATION

Thanks to our efforts, we are supported by RECYC-QUÉBEC's ICI on recycle + program, which testifies to our commitment to making a significant contribution to preserving the environment.

OUR SOURCING PRACTICES

• TEXTURAL PAINT SYSTEM

MAC prioritizes paint processes that are free from lead and cadmium, two metals known for their carcinogenic effects. Additionally, our exclusive Textural IV & III paint systems contain no traces of volatile organic compounds (VOCs), which are also known for their toxicity and harmful effects on the environment and human health. Our sourcing practices ensure that we provide safe and sustainable products for our customers while also minimizing our impact on the environment.

• PREMIUM QUALITY STEEL

Our choice of North American steel for our profiles reflects our commitment to significantly reducing the carbon footprint of our products. What's more, our procurement process respects environmental issues such as handling, methods and transport distance

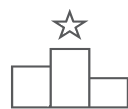

Safe for you and the planet

Did you know that the paint systems we use are lead and cadmium free? Moreover, they contain no traces of volatile organic compounds (VOCs). Our top priority is to provide safe and sustainable products to our customers, while minimizing our impact on the environment.

THE TEXTURAL SYSTEM

- 2x more resistant to UV rays
- 3x more resistant to corrosion

MAC provides two exclusive paint processes, TEXTURAL III (polyurethane) and TEXTURAL IV (PVDF), which offer superior protection against extreme weather conditions and climate. Our commitment is to offer high-quality aesthetic solutions that not only withstand harsh weather conditions but also enhance the beauty of materials while ensuring exceptional durability.

We offer a wide range of rich, unique colors that perfectly replicate the look of noble materials such as oxidized copper, zinc, quartz, and wood. Their matte finish adds a touch of sophistication and eliminates reflections of sunlight, giving them an impeccably clean look.

Our Textural technology is tested and proven to deliver outstanding performance. MAC coatings last the test of time with exceptional corrosion resistance, excellent fade resistance, superior weather protection, and scratch resistance. We use advanced paint technologies for high-quality coatings.

ACCESSORIES

Elevate your style

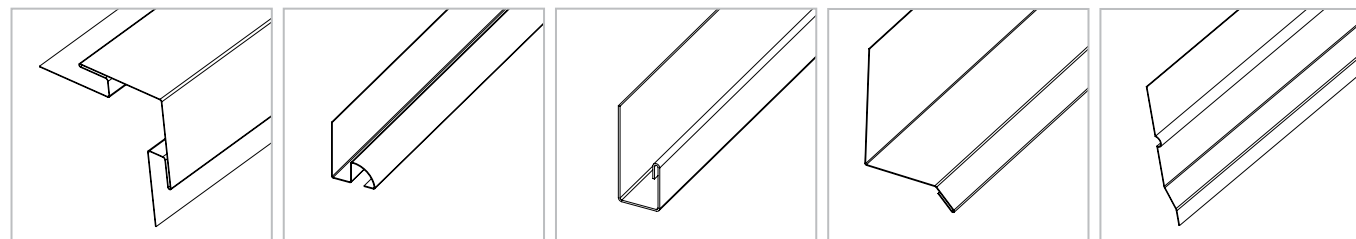

Dedicated to the tiniest details, MAC provides a range of complementary accessories ensuring an impeccable finish.

Marrying functionality with aesthetics, our accessories are meticulously designed to embellish architectural spaces with both elegance and efficiency, allowing you to complete your projects with unparalleled perfection.

Whether you're an architectural professional in search of unique solutions for your projects or a design enthusiast seeking distinctive elements for your environment, explore our collection of gables, moldings, soffits, ventilation, and installation accessories, along with our snow gates. All these elements are impeccably coordinated with our profiles and are available in our exclusive range of colors, giving you a variety of options to refine every aspect of your projects.

Moldings

A wide variety of moldings perfectly designed for each profile family. See our molding guide for the full range of trims & moldings.
